

# PlatinumStripe™ 1800 Series PE-RT Pipe & Fittings

## PlatinumStripe™ 1800 Series PE-RT High-Temperature, High Density Polyethylene (HDPE) Pipe & Fittings

PlatinumStripe™ 1800 PE-RT significantly expands the operation window for polyethylene (PE) pipes with pressure ratings up to 180°F. PlatinumStripe™ 1800 PE-RT is intended for high-temperature Industrial, mining, oil and gas gathering applications.

### Complies with:

- ASTM D3350 Cell Class PE445574C
- ASTM D2837 HDB = 800 psi at 180°F
- ASTM F2619 HDPE Line Pipe
- API 15 LE Polyethylene Line Pipe
- ASTM F714 Polyethylene Pipe
- ASTM D3261 and D2513 (Molded Fittings)
- ASTM F2206 (Fabricated Fittings)

### Key Benefits of PlatinumStripe™ 1800 PE-RT piping systems:

- Higher permissible operating temperatures compared to standard PE4710 products
- Allows continuous operation at temperatures from -49°F (-45°C) to 180°F (82°C)
- Intermittent operating temperatures up to 203°F (95°C) are possible for some applications.
- >20 times PE4710 requirements for stress crack resistance
- Allows use of native backfill material from trench (sandless installation) for shallow, non-traffic applications
- Follows same fusion parameters as standard PE4710 pipes
- Patented stabilizer system for high temperature oxidative environments with ASTM D3350 CC3 rating
- Full range of pipe sizes, pressure capabilities, molded and fabricated fittings

PlatinumStripe™ 1800 PE-RT is identified with four platinum color stripes.

PlatinumStripe™ 1800 PE-RT Pipe Material Physical Properties

Property	Standard	Typical Value†
Material Designation	ASTM F714, ASTM F2619	PE 4710
Cell Classification	ASTM D3350	445574C (black)
Density [4]	ASTM D792	0.950 g/cc (natural)
Melt Index [4]	ASTM D1238	0.1 g/10 min
Flexural Modulus [5]	ASTM D790B	150,000 psi
Tensile Strength [5]	ASTM D638	>3500 psi
SCG (PENT) [7]	ASTM F1473	10,000 hours
HDB at 73°F (23°C) [4]	ASTM D2837	1600 psi
HDB at 180°F (82.2°C)		800 psi
Color [C]	ASTM D3350	Black

† This is not a product specification and does not guarantee or establish specific minimum or maximum values or manufacturing tolerance for material or piping products to be supplied. Values obtained from tests of specimens taken from piping product may vary from these typical values.

## PlatinumStripe™ 1800 Series PE-RT Pipe

Pipe weights are calculated in accordance with PPI TR-7. Average inside diameter is calculated using Nominal OD and Minimum wall plus 6% for use in estimating fluid flow. Actual ID will vary. When designing components to fit the pipe ID, refer to pipe dimensions and tolerances in the applicable pipe manufacturing specification. Additional sizes and DR available.
